

An elegant all-rounder

Glamox C88-P

Magnus Hjelmås
Designer

” C88-P was designed to be a high-quality luminaire that will fit comfortably into a multitude of architectural environments.

It is equipped with state-of-the-art optics that ensure that the light is perfectly distributed and provides a comfortable light with low glare.

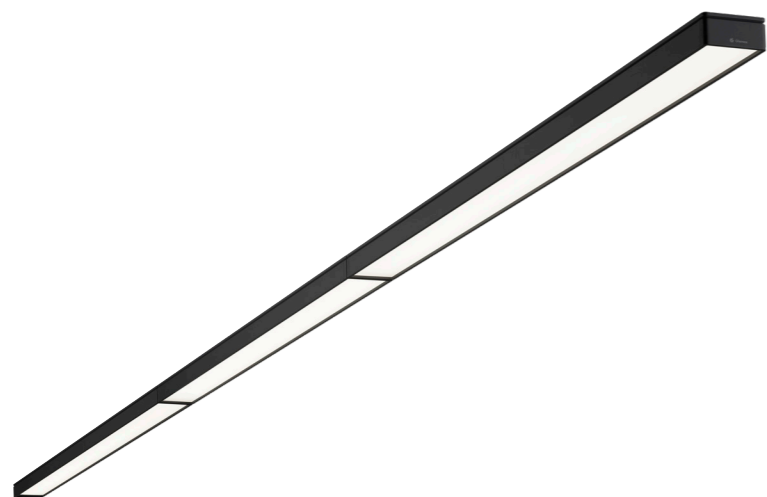

The rigidly constructed aluminium housing binds all the components into a compact luminaire that is very easy to install and also allows for elegant row mounting.

A slender frame encircles and emphasises its beautifully uniform downward light, contributing to an overall logical and functional appearance.

Functional and elegant

The Glamox C88-P is a compact pendant luminaire that offers exceptional lighting quality and superb glare protection. Its remarkably slim and elegant shape features an all-aluminium finish with attractive details – an accent groove, slightly rounded corners, and no visible screws. The product is powder-coated in three universal colours, making it the perfect addition to the interior design in various types of spaces. Uniform and energy-efficient light is important for achieving adequate visual comfort in any room. This is especially true in educational facilities and diverse working environments.

Long lines of uniform light

A homogenous luminance can be achieved in long light lines and a discreet bracket allows for the continuous mounting of the C88-P. This is especially advantageous in offices, where long lines of luminaires can be combined above the employees' desks, or in conference rooms, creating uniform, exceptionally comfortable light for the best possible visual conditions.

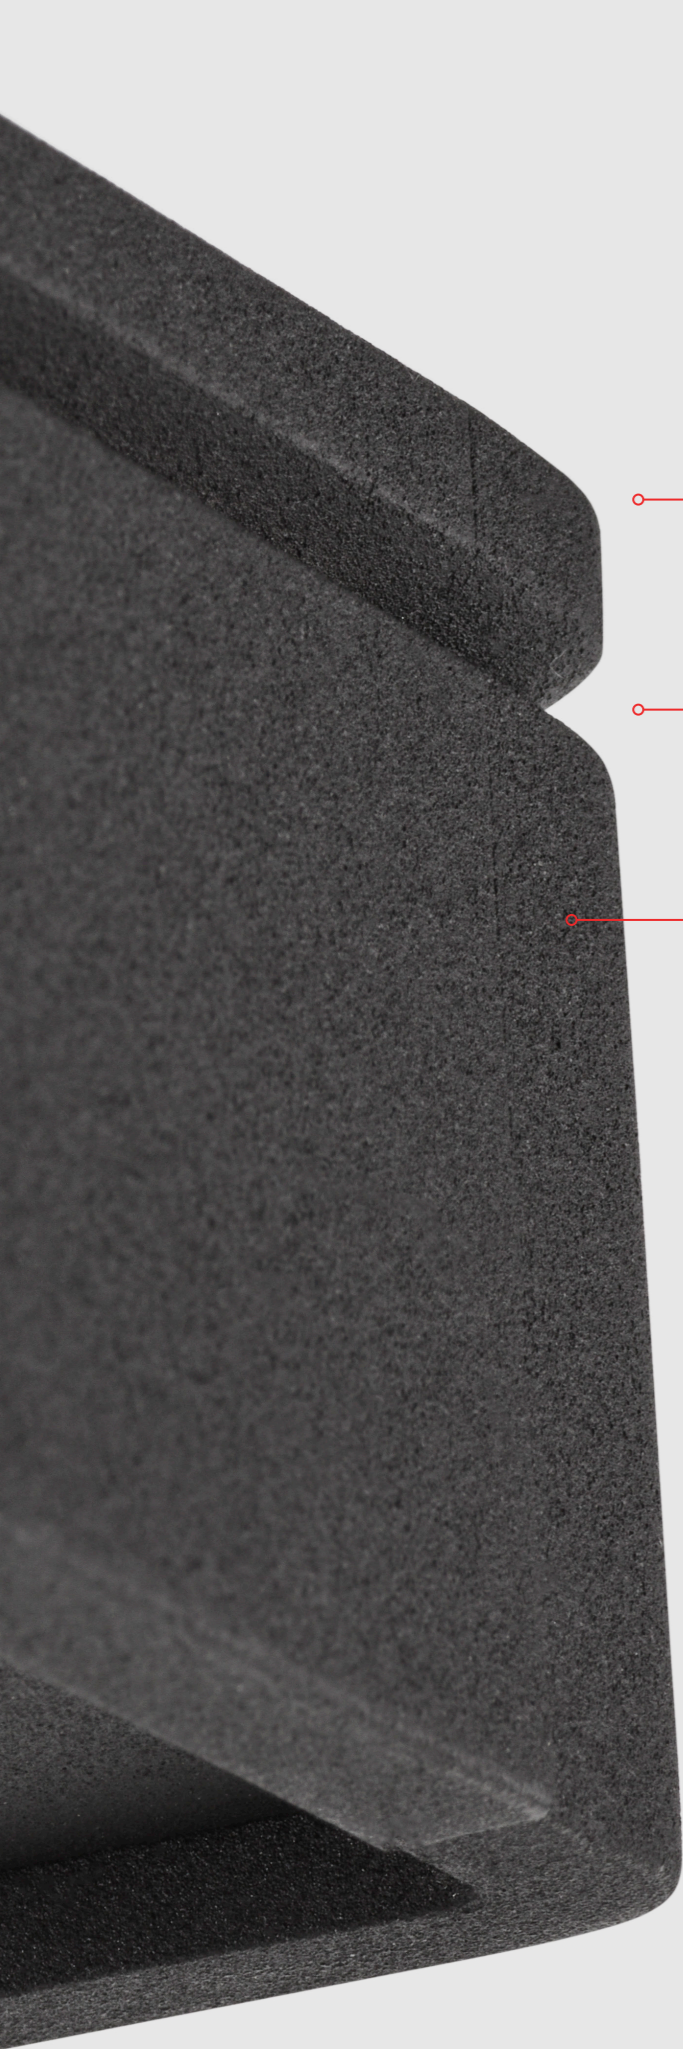

The right light

Well-selected lighting is essential for reading and writing. It positively affects the ability to concentrate and improves your learning efficiency. It's important to ensure the highest quality of the lighting in classrooms – it must absolutely be photobiologically safe for the students' eyesight.

The right lighting solutions help create the experience of comfortable, flexible and stimulating educational environments. The microprismatic, edge-lit optics have a large luminous surface that provides a uniform light output. This creates a soft, incredibly natural-looking illumination. The large luminous surface of the C88-P makes it suitable for creating Human-Centric Lighting

solutions, supporting the students' and teachers' circadian rhythms and boosting their energy levels. It's also cord switch-dimmable and has a high luminous efficacy of 140 lm/W. Improved sensor solutions and row mounting options add to this product's energy efficiency as well as its functionality.

- Rounded edges
- Accent groove
- Recycled powder-coated aluminium

The details

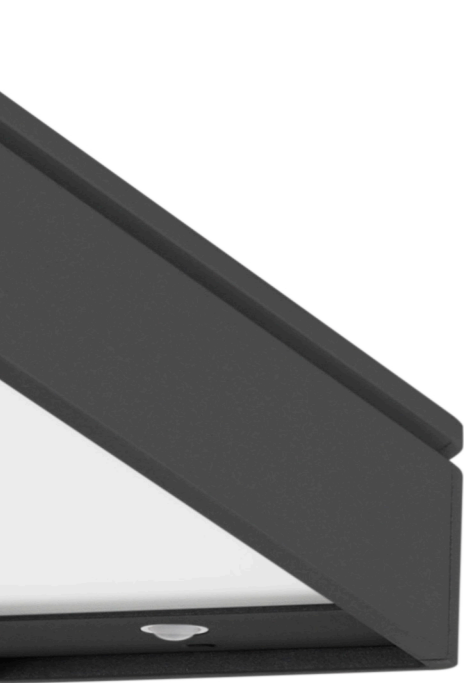

Thoughtful details make the C88-P stand out among other linear lighting solutions. The accent groove encircling the entire luminaire body divides its surface and makes it appear lightweight and elegant.

Large microprismatic optics
(the best glare protection)

A retracted diffuser

Sensors

Advanced wireless sensors are indispensable elements in user-friendly and energy-efficient lighting installations in offices and schools.

A precise balancing mechanism

Flexible height adjustment

A double-cord switch allows for the separate dimming of two circuits. Maximum comfort is within the reach of your hand.

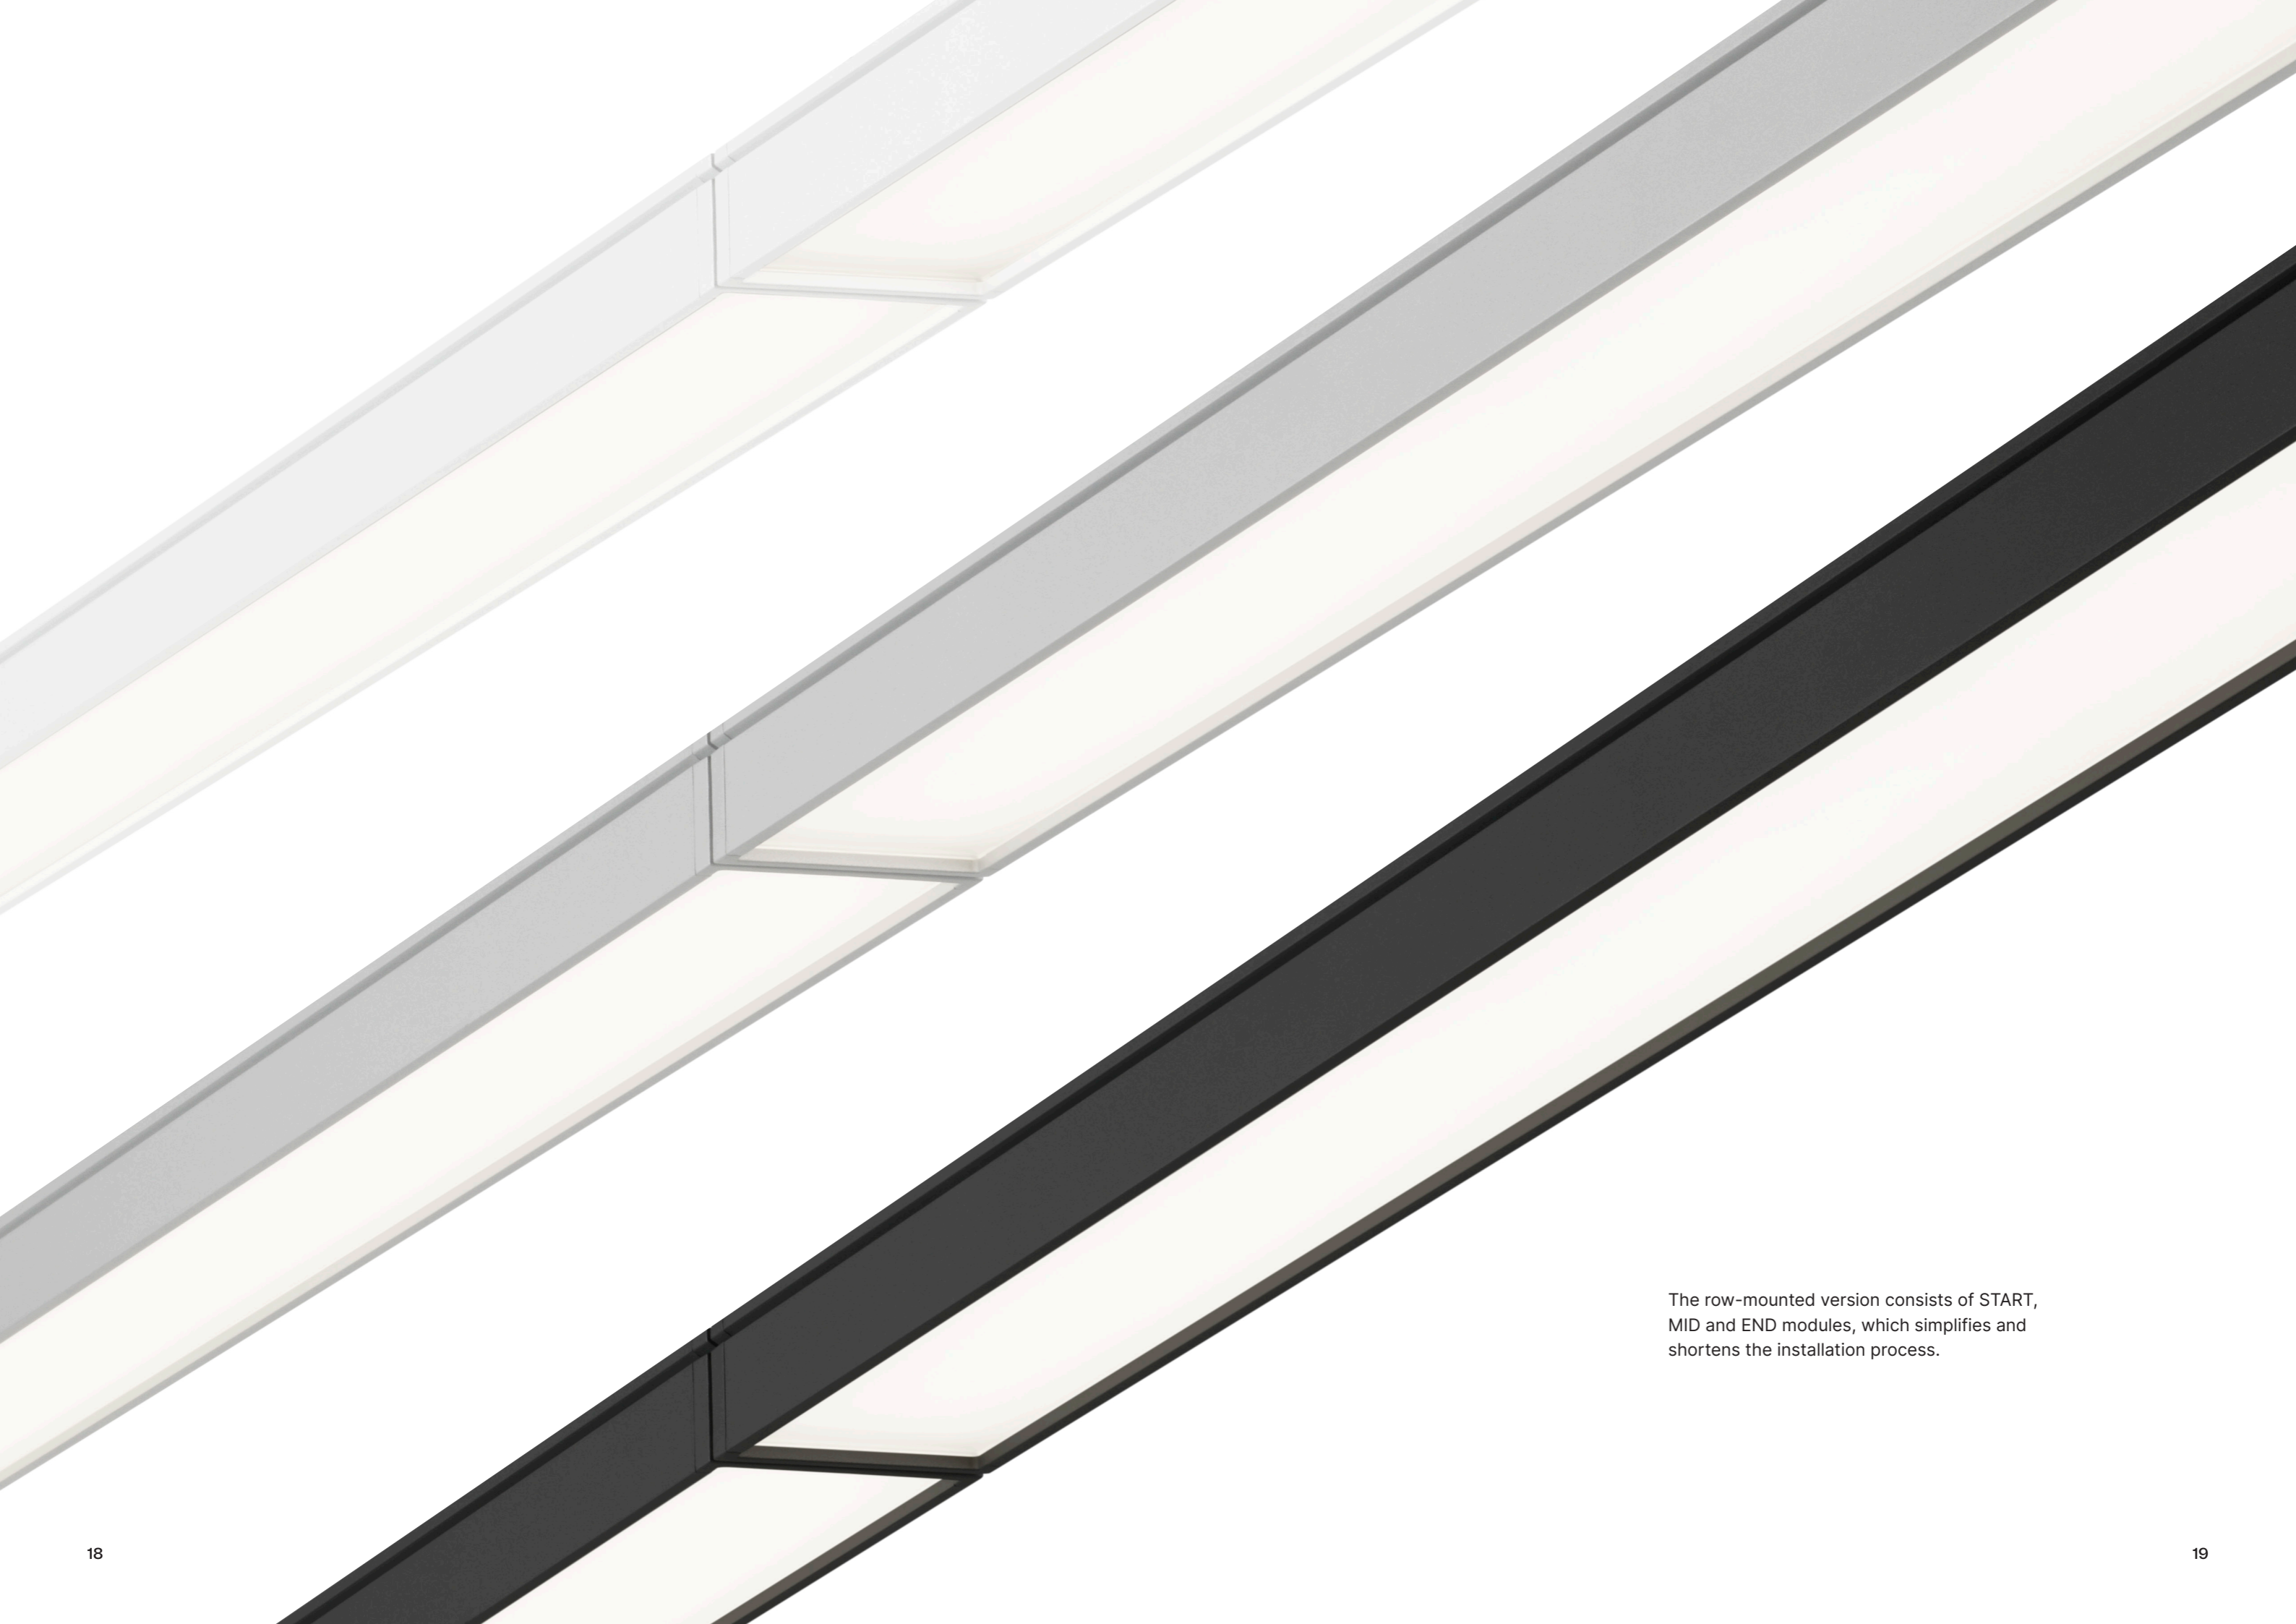

Cord switch dimming

Different light distribution options help to fulfil requirements in terms of illuminating walls and ceilings according to the revised EN 12464-1:2022 standard.

The row-mounted version consists of START, MID and END modules, which simplifies and shortens the installation process.

The Glamox Group

Glamox is a Norwegian industrial group that develops, manufactures and distributes professional lighting solutions for the global market. Our mission is to provide sustainable lighting solutions that improve the performance and wellbeing of people.

High performance and ease of use

Our solutions are designed to combine high performance and sustainability with simplicity and ease of use, offering a superior customer experience. We make smart use of the latest technology and supply it with generations of experience and true care for our customers and their people.

Quality brands and dedicated support

We offer our solutions through a range of quality lighting brands. Regardless of brand, the close follow-up of each customer is at the heart of our offering. Whether in a production facility, a fishing vessel or an office building, our ambition is to provide lighting that contributes to a better life for the businesses we serve and those who work there.
